THE POWER OF  
**BRIGHT\_TV**

- BRIGHT\_TV USAGE  
TRENDS

- MALES  
CONSUME MORE  
CONTENT THEN  
ANY OTHER  
GENDER.

- WE CAN SEE  
WHICH  
CHANNEL IS  
VIEWED THE  
MOST

# CONSUMPTION INFLUENCE & CONTENT RECOMMENDATIONS

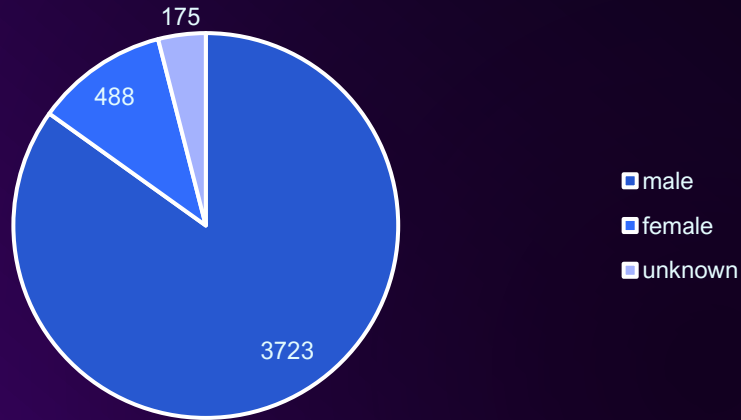

---

- Most of the audience is young people.
- The consumption rate is high after lunch till later into the day.
- More live content should be incorporated as that is that most watched content.
- Such content influences families coming together and watching, which might put Bright TV at an advantage of more subscribers.
- Sports is also viewed the most, so having more channels, that include all types of sports live game shows would influence consumption.

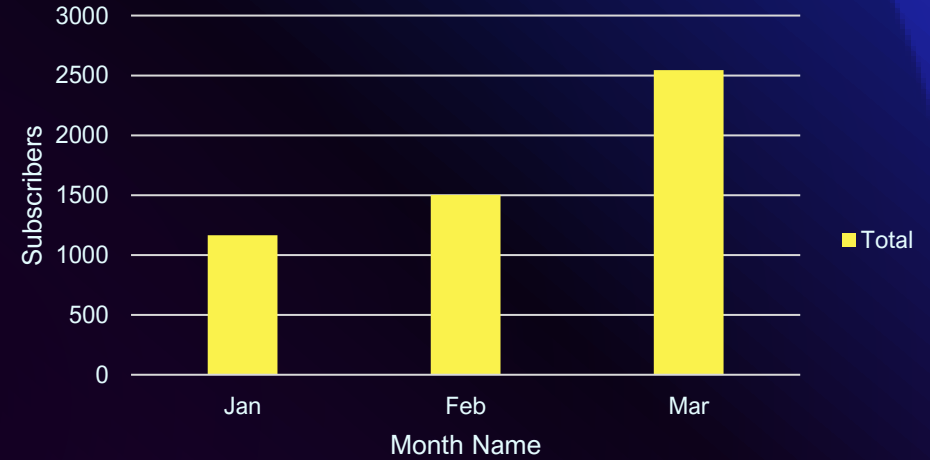

HERE WE SEE  
THE DIFFERENT  
GENDER,  
MONTHS AND  
REGIONS OF  
SUBSCRIBERS

Total Subscribers

Monthly Subscriber

Ethnicity By Region

# FINAL RECOMMENDATIONS

---

## **Own live sport and music**

- Cricket, Live Events, Channel O and Trace TV drive 73% of hours. Secure recurring live rights and build a weekly music-and-sport tentpole for the 12:00–18:00 window.

## **Fix the profile data**

- Have sex, region and birth year mandatory at sign-up, replace the always-on contact flags with verified opt-in, and collapse eight age labels into four clean cohorts.

## **Kill the two-minute bounce**

- Auto-play the next episode, add "continue watching", and surface a personalized rail on open. Moving 10% of no-usage sessions into low usage adds roughly 150 hours a quarter.
